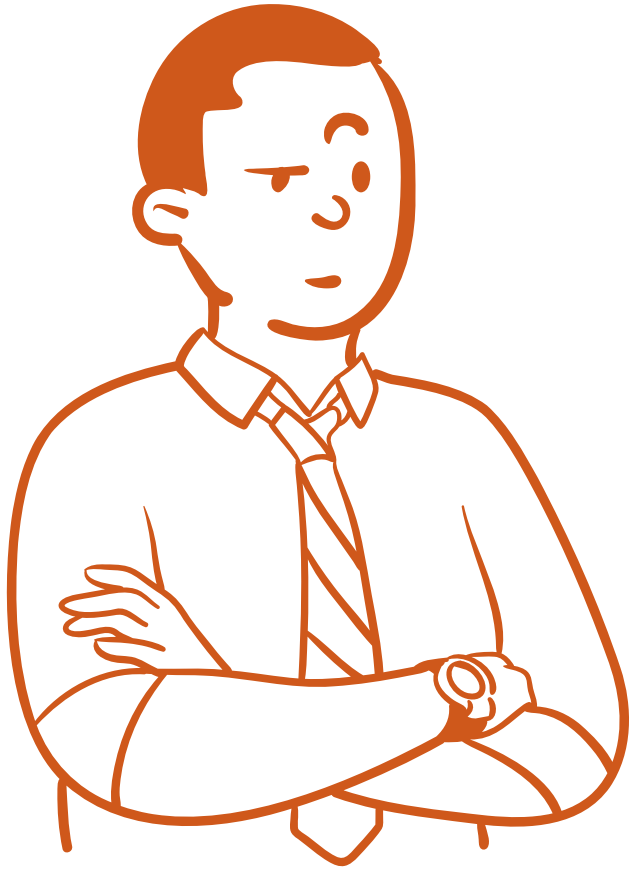
ATAP Overview

Tyler Mitchell, P.E.
ATAP Associate Director

Who or what is ATAP??



Alabama Transportation Assistance Program (ATAP)

- Alabama's Local Technical Assistance Program (LTAP)
- Housed at Auburn University since its inception in 1983
- In 2021, ATAP was incorporated into the newly created Auburn University Transportation Research Institute (AUTRI)

Alabama Transportation Assistance Program (ATAP)

- ATAP operates with an advisory committee, relatively small staff, a limited budget, and significant results

- Works very closely with stakeholders and stakeholder groups

- The mission of the Center is to foster a safe, sustainable, and efficient local transportation system through the provision of timely and cost-effective training and technical assistance on transportation topics of importance to state and local transportation agencies

- Key Focus Areas
  1. Safety
  2. Infrastructure Management
  3. Workforce Development
  4. Organizational Excellence

Application for Assistance through the Safety Technical Assistance Program for Alabama Cities and Counties (STACC)

The Safety Technical Assistance Program for Alabama Cities and Counties (STACC) is funded by the Federal Highway Administration through the Alabama Department of Transportation. The mission of the program is to provide road safety technical assistance to Alabama's cities and counties, particularly those in rural areas or with relatively small populations.

This application is the mechanism by which local governments can request technical assistance to address highway safety concerns at specific locations or corridors on locally maintained roadways in their jurisdictions or to request related training. STACC assistance can include, but it not limited to, network screening, diagnosing safety problems, recommending countermeasures, and supporting road safety reviews.

Site Description (note key roadways, intersections, termini, etc.):

Description of safety issue or concern and summary of supporting information:

Current Initiatives

Training

- Safety Effects of Roadway Design
  - August 5, 2026, Guntersville, AL
  - August 6, 2026, Birmingham, AL
- Leadership Essentials Webinar
  - August 12, 2026
- Pavement Markings: Road User Guidance
  - August 19, 2026, Birmingham, AL
- Road Safety 365 – TBD
- Road Condition Grading – In development
- GIS / Asset Management – In development

Current Initiatives

Technical Assistance

- Safety Technical Assistance with ALDOT (STACC)
  - Focused on counties with highest fatal and serious injury and ped/bike involved crash rates who do not already have and are not currently developing a LRSP or SAP
- Grant Opportunity Clearinghouse webpage and associated training

Conferences

- 13th Annual Alabama Road Safety Conference
  - October 13-15, 2026
  - The Lodge at Gulf State Park, Gulf Shores, AL
